

SOLUTION BRIEF

Powering Media & Entertainment

Visualize and interact with media workloads from anywhere with Teradici PCoIP solutions

Creative professionals worldwide depend on PCoIP remote workstations for uncompromised user experience – ultra-secure access to graphics-intensive 3D applications while your media assets remain protected. With Teradici PCoIP solutions, you can now work from anywhere, whether your assets are secured in your own data center or your choice of public cloud.

Stay Compliant with Content Security Practices using PCoIP Solutions

Major studios rely on the PCoIP protocol to conform with MPAA (Motion Picture Association of America) best practices and other data compliance standards. Media assets are securely isolated in the datacenter, only accessible from authorized network endpoints as an encrypted stream of pixels. Because media files themselves are never downloaded to the endpoints, intellectual property remains secure, no matter what applications are used.

Unrivalled Remote User Experience

Access your go-to editorial or VFX applications configured for multi-monitor 4K or UHD display topologies, including lossless text and color accuracy – no more blocky compression artifacts imposed by the display protocol. Use your Wacom tablet for artistic editing with near-imperceptible interactive latency.

Consolidate Graphics with Storage and Render Farms

Give your creative applications a boost by consolidating your graphics workstations alongside existing cloud storage and render farms. If your production house has multiple offices or recruits remote contractors, support them via a central location or the public cloud, providing dramatic savings in equipment, logistics and support costs.

Prepare for a Public Cloud Future

Prepare for a future in which you are free of shameful real-estate bills thanks to your expensive downtown data center. Many enterprises now have access to on-demand cloud workstations at incredibly low latencies, with performance rivaling even campus networks.

Multicloud Support

Transition to the cloud on your terms. Cloud Access Software supports any mix of private or public cloud environments, Windows or Linux virtual desktops and GPU or non-GPU based infrastructure.

“ Because the Teradici innovations focus on pixel-level transmissions, our artists can achieve 100-percent color matching and take advantage of full-HD, lossless imaging over affordable IP networks.”

INDUSTRIAL LIGHT & MAGIC

Extend your Talent Pool, Internationally

Gone are the days where geographic expansion plans snowball into large CAPEX outlays and IT infrastructure overhauls. Staff up with those highly sought international professionals or orientate your production towards those out-of-state tax credits, either cross-border from your data center or via a public cloud facility in a different region.

Reduce Noise and Power Consumption

Deploy low-power PCoIP Zero Clients for the ultimate comfort of your creative professionals — no more heat exhaust from local workstations or distractions from noisy fans. You'll see the benefit in the bottom lines of your air conditioning bill and spend less time on IT maintenance too.

Solutions

Teradici All Access subscription plans give you PCoIP remoting solutions that lower IT costs and administrative time while allowing your team the flexibility to work any way they need to. With All Access, you can now securely deliver workspaces and applications from the cloud or datacenter of your choice - migrate your existing applications, mobilize your creative teams or leverage the power of GPUs in the cloud.

Desktop Access

For VMware Horizon or Amazon WorkSpaces users, and PCoIP Zero Client and Management Console Enterprise administrators.

Cloud Access

Deliver Windows or Linux workloads from private data centers, public clouds or any combination of the two. Now includes support, resources, and brokering for PCoIP Remote Workstation Cards.

Cloud Access +

Deliver graphics-intensive Windows or Linux applications from private data centers, public clouds or any combination of the two. Now includes support, resources, and brokering for PCoIP Remote Workstation Cards.

Professional Services

Our Professional Services deliver the expertise and experience of our engineering and support teams. As your trusted PCoIP technology partner, we will help design, integrate and optimize your PCoIP deployments, so you can focus on your core business.
